

Note: Answer all the questions.

Reading Comprehension (25 Marks)

Q1) Read this text carefully.

Three - quarters of our planet is covered by water. It is the most important liquid on Earth. We can't live without water. We can find water in oceans, seas and rivers. Water goes round and round in a process called " the water cycle ". On hot days water vapours and forms clouds. Then it cools and becomes liquid then falls down as rain or snow. Human beings and animals need water to stay alive. You can go for many weeks without food, but if you don't drink water for three or four days, you could die. Plants also need water and can't grow without it. So we should use water wisely so that there will be enough of it for future generation.

(10 M.)

A) Now Answer (Five) of the following questions:

1. Why is water very important to us?
2. What is the process of water called?
3. Who needs water?
