

Note: Answer all the questions  
Reading Comprehension . ( 25 Marks )

Q1 ) A) Read this text carefully .

A mountain is an area of land over 300 meters high. Mountains are millions of years old. Different animals and plants live in different parts of a mountain. It is very cold and windy at the top of mountains and there is a lot of ice and snow. Also there is not much oxygen so no plants can grow there. In the middle part of a mountain, a lot of evergreen trees grow. They are called evergreen because they keep their leaves all year round. More types of wild animals can live here such as deers , wolves, bears and birds. At the bottom of mountains, it is not so cold therefore many animals and plants live there including trees which lose their leaves in winter, people also build towns and villages here. Mountains can be very difficult to cross and climb because of the snow and ice. Tourists visit mountains for the beautiful sights and skiing. Mount Everest is the highest mountain in the world.

Now answer ( Five ) of the following questions :

( 10 M. )

1. Why are plants in the middle part of a mountain called evergreen?
